- Kotlin (Android)
- C#
- Machine Learning
- Docker, Jenkins
- Git / GitHub
- Linux (3 Years)

SOFT SKILLS

- Team Working
- Responsible
- Communicative
- Fast Learner

LANGUAGES

- Indonesian (Native)
- English (Intermediate)

EXECUTIVE SUMMARY

Informatics graduate-to-be from Universitas Kristen Indonesia Maluku (thesis completed, awaiting graduation), specializing in **Full-Stack Web Development**, with additional experience in Mobile, IoT, Machine Learning and VR. Proven track record building and deploying government-funded and community applications across Maluku, from web systems with Laravel, React and Node.js to Android apps and ML-powered tools. Experienced with databases, REST APIs, Docker and Linux. Ready to contribute and grow in a professional development team.

EXPERIENCE

Full Stack Developer (Project-Based)

Freelance & Community Projects | 2024 – 2025

- Designed and built web applications end to end: UI with React and Tailwind CSS, backend with Laravel, CodeIgniter and Node.js, databases in MySQL, MongoDB and Supabase.
- Developed e-commerce, information system and document management platforms for local businesses, communities and organizations.

Internship – IT Division

Bank Maluku

- Supported development and operations of banking information technology systems.

Healing Touch App – Android Developer

Kemendikbudristek-DRTPM | Nov–Dec 2024

- Built a children pain assessment app using facial expression, leg movement, activity, crying and consolability indicators.

Cancer Screening Application – Developer

Maluku & North Maluku | 2024

- Developed a digital cancer screening system deployed across 2 provinces.

TABAOS Disaster Prone Area Mapping App

Province of Maluku | 2024

- Built a mapping application of disaster-prone areas covering the entire Province of Maluku.

VR Earthquake Simulation – VR Developer

UKIM x Universitas Indonesia | Kosabangsa | 2024

- Developed a VR earthquake simulation in collaboration between UKIM and Universitas Indonesia.

VRI Maluku Letter Archive Web System

VRI Maluku

- Built a digital letter archive and document management web system.

IoT Projects – Developer

Kilo-Kilo & Kuralele Village | 2024

- Built an IoT automated plant irrigation system and an IoT navigation aid for the visually impaired.

EDUCATION

Universitas Kristen Indonesia Maluku (UKIM)

Informatics | Aug 2022 – Present (thesis completed, awaiting graduation)

PORTFOLIO (Selected)

VC App – React JS — Real-time video call application — github.com/cleyxcode/vc-react

Banana Online Store (2025) — Online banana sales platform with product catalog and digital transactions

Toisapu Village E-Commerce (2025) — Local small business e-commerce platform

GPM Masohi Information System — Congregation management and church administration system

Skin Cancer Detection – ML Web App — Web-based skin cancer detection using Machine Learning

Movie Watchlist & Spotify Playlist Apps — Web apps built with TMDB and Spotify APIs

GPM Hymn Collection App — Digital hymn collection app for Gereja Protestan Maluku

Healing Touch App — Children health assessment Android app (Kemendikbudristek-DRTPM)

UI/UX Design Projects (2025) — Modern UI designs for web and mobile applications
